

When 'every second counts' ...get ECHO-connected!

ECHO-connected police forces ensure the quickest police response in attending your property, should the need arise.

Only certificated Intruder and Hold-up alarm systems provided by approved installers can deliver ECHO-connected service.

Utilising secure police preferred networks, your Intruder or Hold-up alarm system is primed with a state of the art fast and robust connection via the ECHO platform, to alert the police in the event of a confirmed* alarm activation.

*Alarm Receiving Centres verify alarm activations as genuine.

Faster police response – up to 4 minutes quicker!

ECHO-connected police forces in the UK receive automated signal transmissions from approved Alarm Receiving Centres direct to their dispatch desks.

Police estimates indicate a saving of up to 4 minutes in response times, which could prove critical in an emergency situation. For a full list of ECHO-connected police forces go to echo.uk.net

Get **ECHO-connected**. Talk to your approved security system installer today or check your existing maintenance contract terms and conditions.
